Memo

In. Pro c/o 8481-83 dated 9th Nov 1875.

21st January 1899. sanction was accorded to an estimate for Rs 6464 on account of the cost of maintenance of the Vani Vilas water works during 1898-99 with a request that the Chief Engineer would intimate to the Comptroller the actual amount expended on the works at the close of the year, for recovery from the Mysore City municipality

2. Accordingly, the Chief Engineer forwarded with his Memo c/o 3731 dated 18th July 1899 letter from the Sanitary Engineer c/o 3056/1104 dated 12 Idem intimating that

that the outlay incurred

up to end of June 1899

amounted to Rs 7963-7-4

and requesting sanction to

the excess expenditure of

Rs 1499-7-4 (and not as 1479-7-4

as given in the Comr.). This

reference was submitted

for orders with letter ew 47 (cl 23 in L.2 103 of 92)

dated 15 July 1899 from the

President of the Mysore

City municipality soliciting

sanction to the levy of water

tax at 4 cts on every Rupee

of House tax, exemption

being allowed in the case

of houses having service

connections and to the

Municipality being reimbursed

of the cost of maintenance

of the waters works at least

the year 1898 99, on the

ground that the tax, if sanctioned, can be collected only from the current year and that the closing balance ~~xxxxx~~ which is much below the prescribed minimum will be affected otherwise.

(3) In regard to the proposed levy of water tax, it was pointed out that the President's recommendation was not in accordance with rule 199 of the Municipal Regulations and revised proposals were called for.

Pro etc 2280 of 22.8.99
& F 103-92
(Sl 25)

(4) Accordingly the President proposes the levy of water tax at 2 per cent on the rental value of houses and the revision of House tax as recommended in the previous B.M.

dated 18th November 1897,
as the House tax in the
City is levied on valuation
of houses at present and
not on rental value as
required by the Municipal
Regulations.

---

(5) With reference to
Pro etc $\frac{8481\text{-}83}{\text{Mes } 1895}$ dated 21st
January 1899, the Chief
Engineer forwarded Docket
from the Sanitary Deputy Engr
stating that the working and
maintenance charges of the
water works were being levied
as ordered but that the
management of the works
was still retained by the
Sanitary Dept; and requesting
sanction to the transfer of the
the 2nd portion of the
scheme ~~consisting of 2 parts~~
as noted in the margin.

Sl 19 in L.F 103 of 92.

+ Memo etc 4732 of 12/9/99 (5/24)

(1) Vanes Vehar water work.
for supply to Ellyson City in
pumping from (sewer)

(2) Additional distribution
of water to Ellyson City from
the Tinnevelly water works

which has been completed,

~~Could~~ The communication was forwarded to the President for report as to whether the Board were prepared to accept the proposed transfer The President accordingly ordered Boards resolution dated 30/9/99 accepting the transfer

---

Sl 15 in L.F 103 of 92

(6) With reference to O. M. No $\frac{1077}{5013}$ of 6-10-98, the President of the Ellyarn Urban Council

W 196 of 14/9/99 (Sl 28)

requested information whether the water supply scheme was completed and whether the quantity of water in the water works will be sufficient to meet the demand of those who may

for House connections under
sees 198. 199, 200 and 201
of the Municipal Regulations,
so as to enable him to
levy a general water tax
on the house-owners of
the City. This letter was
forwarded† to the Chief
Engineer with a request
that the information therein
desired might be furnished
early to this office. Up
to date no reply has been
received from the Chief
Engineer. May a reminder
be issued?

† Pro etc $\frac{4382-83}{L.F.103-92}$ of 30-9-97
(Sl 29).

Secy's order on Office slip
Let this go, but when a reply
comes please draw my special
attention to the subject as the
water supply provisions
have been modified and
sent up to the Court of Index
for sanction.

—

Points requiring orders
in this file are given below.—

remission of
House tax according to
rental value of houses.

(2) The levy of water. (2) The municipal Engineer
[illegible]

tax at 2 per cent on rental value of houses.

(3) Sanction to the excess expenditure incurred on the cost of maintenance of the water works

(4) Relief to the Municipality of the cost of maintenance of the Varuvalas water works at least for the year 1898-99

(5) Transfer of the completed portion of the Varuvalas water works.

Submitted for orders with a copy of the Draft Municipal Regulation amending provisions in regard to water supply.

DJ 6/11/99

been abolished by the Govt of India Provisions for water supply levied by Govt. Under present law it is 2 per cent. & the Council rate the duty was required to yield Rs 9000 odd which seems enough for maintenance. This in any humble opinion may for the present be authorised if the question cannot be done for a short time in expectation of Govt of India sanction to the new law.

3) This has of course to be done later.

4) This is a matter for consideration - The Govt has released the charge & ask for repayment.

5) This may be done.

(5)

There probably is an order
already recorded to the
following effect :-

1. That the Govt. will make

Mcal. 97-
2-

9
10 (10)

a free gift of the Vanivilas Ws-works
to the Mysore City,

2 That the Munic. must maintain
these works from its ordinary
income, ~~& without imposing~~
~~a Special water rate~~ and
maintain a proper distribution
permanently, without imposing
a Special water rate for the
purpose -

3. The Condition that no
Special water rate is to be
imposed is based on the idea
that such a rate for water
will not be appreciated in
~~Conservative Mysore~~, & That
the Munic. Dcl out - is not to -
pay for the works, & that
the Comparative Small Cost
of annual maintenance
is easily met from the
ordinary Munic income,
which if necessary can be
revised, to the extent of
the requirements of the Board

4. The above was the intention
of the first, but if no notice
has been recorded, the

Matter can be now settled on its merits.

5. Even on the merits I am of opinion that it is undesirable to impose a special water rate, if it can be avoided. If the Minister can't raise funds otherwise then it must be allowed to impose a water rate.

6. The maintenance charges for 1898 (up to 30 June 1898) may be remitted as a special Concession. No further Concession of this kind will be made & this shall be distinctly notified to the Board.

~~7. The Minister before taking over management~~

7. The payment by Minister of the Irrigation Works including the Cost of the Pumping Station, whether the Board is able to take over the management of this immediately or not —

8. The payment for 1898-1900 (for 1 Jan 1898) shall be made without reference to date on which management may actually be assumed by Minister or the levy of any special water rate by it.

30 11-98

Mud 56-97 C Memo

In his letter no 3819 dated 7th July 1902, to the address of the President, Municipality, the Chief Engineer suggested whether the Municipality would bear the cost of 3 new Turbines required for the Balagola water works. The Board resolved to purchase the 3 Turbines at a cost of Rs 5000/- and to request the Govt to take charge of the old Turbines and in return to relieve the Municipality of half the cost of the new Turbines amounting to Rs 5000, which the Board is unable to bear, for want of funds.

P. no 0726-7-02

In forwarding the above proposition the President has

this letter dated 22-10-07 requested that the old Turbines might be taken charge of by Govt and the municipality relieved of a moiety of the cost of new Turbines

3 About the end of October 1902, orders were passed in the P.W.D to purchase the new Turbines from State funds, the amount (Rs 5000) being treated as an addition to the current years Budget

4 As the municipality was entirely relieved of the cost of the new Turbines instead of a moiety as prayed for by the Board, the office draft included their proposal to take charge of the old Turbines, directing the sale proceeds to be credited to State fund the Chief Engr having reported that the old ones would fetch a fair price, of total

Submitted

There will be a

Turbines
them

Vaul 58-97

Memo

'' The vanivilas Water Works for supply to the Mysore City by pumping from the Cauvery '' were completed at the cost of Provincial funds and transferred the Municipality for maintenance with effect from 1st July 1898 with a stipulation that from that date the cost of maintenance of these works should be borne from Municipal funds of the City. On a representation made by the Board, the Government were pleased to relieve the Municipality of the maintenance charges incurred during 1898-99 with an observation that no further concession of the kind would be made for future years. In 1906 the Government made a free gift of these works to the Municipality.

2. The second portion of the scheme viz " Additional distribution of water to Mysore City from the Vani vilas water works" having been completed by the Sanitary Department at the cost of Provincial funds, the same was also transferred to the Municipal for maintenance. With reference to this the Municipal President states that the Municipal Engineer found several defects when he took over charge of these works and requests the issue of orders to the Sanitary Superintending Engineer to rectify them before handing over the same to the Municipality.

...itary Suptdg Engineer's No ...6/505 dated 4th September ...99, received with Chief Engnr's ...4732 dated 12th September ...99.

...: No.9412-4 /L.F.103-99 dated ...th March1900. (

...ter No. 161 dated 5th. ...tember 1900. (Sl 12 in Part II)

Draft forwarding a copy of this letter to the Sanitary Superintend -ing Engineer is submitted for approval.

3. In his No. 89 dated 7th. August 1900, the President proposed the introduction of rules for the regulation of House connections. Draft as per orders is submitted her with.

4. The President brought to the notice of Government that the supply of water to the City decreased considerably ~~sequently~~, as the turbines have gone out of order and that consequently the higher parts of the city only are supplied by the turbines with the ~~turbines~~-Cauvery water and that too for certain hours of the day only and the remaining portion with Kukerahalli Tank water. He suggested that the Boblikere fo might be opened so as to admit of the portion of Doddakere being filled during the next rains. // In his letter No. 606 dated 6th. May 1900 he stated that the supply has actually ceased owing to the failure of works at Belagola and that only low lying parts of the City were being supplied with Kukerahally tank water. Thes communications were forwarded to the Secretary Public Works Department with the remark that Government could not but regret that the failure of the water supply should have

& 32 in sect III

Memo No. 11388/L.W.103-92 dated 14th. April 1900 & 31/c

Memo No. 12354/ L.W. 103 -92 dated 12th. May 1900. & 33 in sect III

taken place at this inopportune time ∅(marriage season) . He in reply

r No. 4170 dated 7th. Sept. forwarded Sanitary Superintending Engineer's explanation regarding the stoppage of Pumping Works at Belagola during March 1900 and stated that report of irregularities brought to the notice of the Dewan as regards improper consumption and the overtaxing of the pipes by the establishment of numerous house connections still remains undisposed of.

14 in Sect. II

er No. 179 dated 12th. Sept. 1900 The President complains that the Belagola Water Works go out of order every now and then and that these and Ontikoppal Reservoirs are under the immediate supervision of th Sanitary Department, the cost being met by the Municipality. A large establishment is maintained but with all that , the difficulty for water in the City is increasing He therefore suggests the employment of a mechanic to manage the machinery and the whole work is placed under the direct management of the Municipality, so as to give no room for frequent complaints as at present and adds that an Engineer may be deputed to examine the machinery and plant once or twice a month and and report on the same.

Sl 15 in Sect. II

Draft calling for information as regards cost is subm it

4. The Sanitary Superintending Engineer in his letter No. 1290/251 dated 20th. June 1900 brought to the notice of the Chief Engineer certain grave irregularities and defects in connection with the drainage and water works of the Mysore City as well as of Nanjangud, Yedatore , Hunsur and Closepett. In submitting this for the orders of the Dewan, the Chief Engineer opined that it would be better to have no drainage and water systems than ones that were so neglected, as they would positively become a source of danger and suggest -ed that all the drainage and water supply schemes might be left in charge of the Sanitary Department, that department being strengthened and the Municipality paying for the extra establishment required. Upon this the Dewan recorded the follow -ing order:-

"

To

The 2nd. Councillor

The report discloses a most lamentable condition of things. An explanation should be called for from the municipal officers concerned and the President should be asked to submit the same as quickly as possible together with his own remarks as to what extent the blame rests on the various officers and the measures he would propose

as regards the future.

When the foregoing is received the Government should pass orders placing the management upon a satisfactory basis.

I should like this matter to be treated as one of special urgency".

Intd K.S.

3.7.00.

Under orders of the then 2nd (now 1st) Councillor, these papers were sent to the Deputy Commissioner of Mysore for very early attention and report. To this replies have been furnished by the President City Municipal Commission Mysore in his letters Nos 192 and 440 dated 17th September and 20th October 1900 respectively.

The papers having been submitted for orders, the following orders were recorded:--

(1)Submitted to the 2nd. Councillor.

The President of the Board refutes every one of Mr. Standish Lee's statements. With assertions on one side and denials on the other, it is difficult for Government in the Municipal Department to decide exactly wherein defects and shortcomings lie and how the blame is to be apportioned. The matter seems sufficiently important to have several points involved in the complaints by Mr. Leeand retorts by Mr. Mudiah, thoroughly

investigated on the spot by such unprejudiced and high officers as the present Heads of the Public Works and Medical Departments. Nothing short of a joint report based upon such investigation is likely to lead to any satisfactory results.

Intd. C. S.

Secretary.
4th. February1901.

(2) I quite agree with the Secretary. Ihad the same difficulty. It is desirable that control should vest in one body, preferably the Municipality, but the works, I suppose were done from State funds and the Municipality moreover has no skilled agencyto properly supervise the sewerage and water supply arrangements. The suggestion to ask the Chief Engineer and Sanitary Commissioner to take up the question and decide as to who should have control and under what conditions is good and may be adopted. I would in that case place the whole question before them.

Intd. V.P.M.

4th February 1901.

Submitted to the Offg Dewan

Intd. C.S.

5th February 1901.

3) I agree with my Colleague and also in the views of the Secretary.

Cmd 58-97

Orders may issue as proposed.

Intd. T.R.A.T.

6th February 1901.

The above orders having been issued the Chief Engineersubmitted a joint report on the subject and an office note by Mr Mac Hutchin in regard to the future control of the sewerage nd water systems of the Mysore City.

A tabular memo showing in juxta position the irregularities pointed by Mr Lee, the President's explanation thereto and of the observations of the Joint Committee is appended.

The Chief Engineer's proposal to transfer the entire costs of the water system to the Mysore City Municipality, has been sanctioned in Proceedings No 1654-7 dated 29 7 01

Mysore City Municipal
President's Office dated the
18th November 1897

Mrml 556-97

To.

The Secretary to the
Government of Mysore
Revenue and General departments

Sir,

Referring to the Government
Proceedings no 8924 / L.F 161-92 dated the 6th
February 1897 sanctioning the revision
of house and mohalwfa taxes in the
Mysore City Municipality, I have the
honor to state as follows:-

2. The house tax that was
levied in the city was revised some
years back according to the rules
contained in the Revenue manual
as per Para 11 of Chief Commissioner's
Proceedings no 30627 / Mrml 161 dated the

the 27th September 1879 al. the rates
based on the Valuation of property
concerned as specified therein and
the same principle was followed in
the case of new buildings.

3 Though the value of houses
has very much increased since then
owing to improvements made to them
by the owners from time to time and
also in the city by the Municipality
by way of widening streets con-
structing drains &c yet the rate that
was once fixed has been continued
to be levied without any alteration.

4. Now on the receipt of the
order under reference the Value of
all the houses has been revised with
the help of the Municipal Com-
missioners according to the present-

market value in each locality and the
rates given in the Revenue manual
have been adopted in fixing the tax
and as directed in the above rule 1700
houses being huts of small value
belonging to poorer classes, besides
public offices and charitable insti-
-tutions, have been exempted from
taxation.

5. As two taxes cannot be
levied on the same house as per
Chief Commissioner's official memo
~~Government Proceedings~~ no 265
dated 28th February 1860, the houses
which are used for shop, oil-mill
and loom as well as for habitation have
also come under the exemption. Thus
Rs. 1892/- being the amount of tax
is remitted every year on 286
buildings as noted below.

For shops:	459	houses	taxed at	Rs 784
For oil-mills	34	do	do	" 76
For looms	90	do	do	" 85
For poor huts	1700	do	do	" 947
Total	2286			1892

6 In revising the tax recently this exemption also has been observed. The abstract statement prepared according to mohallas and submitted herewith shews that by adopting this system the present house tax of Rs. 15592/- will be raised to Rs. 21706/ exhibiting a net increase of Rs. 6114 over the existing taxation.

7 In the municipal Regulation section 64 it is provided that the house tax should be levied at 5 per cent on the annual rental value of houses. But in this town very,

few houses are rented as most of them are used by the owners themselves or their relations for private occupation and therefore it has been found not easy to ascertain the rental value.

8 However in consultation with the Commissioners the probable rental value calculated on the rate of rent prevailing in the town has been duly considered and a statement prepared accordingly (copy herewith submitted) will shew that the revision of mahalwara on the lines indicated above would result in a loss of Rs. 76 to the municipality.

9. In following this system not only the small huts of poor persons, but also houses whose rental amount is less than Rs. 14/- have to be exempted

Even

thus out of 14968 houses in the city 8096 yielding a revenue of Rs 49351/- will have come under the exemption. thus it appears doubtful whether the revision on the above principle can be introduced with any advantage to the municipality as the immediate result of such a step would be a small decrease in the existing revenue. This is certainly disappointing in as much as the Board must have had in view when moving the Government for sanction of the Mohalwise tax that owing to the extension of the town, increased number of roads and opening out of the congested parts and general improvements of the city it would be financially in a better position after the revision to

to meet the increased demand for the efficient management of the municipal affairs. But on the contrary if such a revision ends in a loss in the present revenue, it would be desirable perhaps to allow the existing state of things to remain undisturbed unless the Government is prepared either to remove altogether or reduce the minimum amount namely Rs 144/- now fixed for exemption and to amend Section 64 of the Municipal Regulation.

10. If this is not considered desirable or expedient I would propose that the revision of the tax as per market value showing an increase of Rs 6114/- may be

adopted for the present pending the revision of the municipal Regulation, which is under consideration of the Government.

2 I request therefore that you will be good enough to obtain the instruction of the Government as to which of the two systems above alluded is to be adopted in giving effect to the order under reference.

I have the honor to be

Sir,

your most obedient Servant

[signature]

for President.

No. 576

Enc. No.

MYSORE CITY MUNICIPAL PRESIDENT'S OFFICE,

Dated 11-9-97

189 .

Recd 5-9-97-27

To

The Secretary to the Government
of Mysore
Revenue and General Depts

SIR,

With reference to Government
(Secy) proceedings No: 2280 / F. 103-92 dated 22nd August 97
requesting to submit the proposals for
levying "General Water tax" with due re-
-gard to the provisions of the Municipal
Regulation, I have the honor to state
that the question was again discussed
in the Board on the 30th September 97
and a copy of the Resolution is here-
with submitted.

The House tax in this city is
levied on the Market valuation of
the houses according to rule, given in
the Revenue Manual, but it

the Regulation provides for the levy of taxation on the "Annual rental value". In Conformity with the same a Statement has been prepared Showing the Rental Value and the amount of house tax due thereon. There is no appreciable increase in the demand as the revision is based on the Rental Value of the houses calculated at Rs 5 per cent on the Market value of the same.

Sanction of Government may be accorded to the revised house tax as already recommended in this Office No 272 dated 18th Nov: 97 | Submitted to Government

From the enclosed Statement, it may be observed that the Water tax will amount to Rs 7161 at 2 per cent on the total Annual

Annual Rental Value of Rs 4,580/- 37 34

This will very nearly cover the charges for the maintenance of the Vani Vilas Water Works and the distribution of water in the city amounting to Rs 10,000.

Under these circomstances I request that you will be good enough to obtain the Sanction of the Government for the Revision of House tax and for the levy of Water tax at 2 per cent on the rental value.

I have the honor to be,
Sir,
Your most Obedient Servant
[signature]
For President

Extract from the Proceedings of the Municipal Board, Mysore city, dated 30th Sept 99.

× × ×

IV -Consideration of the question of levying 'General water tax' with reference to Government Proceedings No. 2280/A F 103-92 dated 22nd August 99

Resolved that the Government be moved to sanction the revised house tax levied on the rental value of the houses as per annexed statement which shows the total rental value to be Rs 4,58,055 and the General water tax at 2 per cent on this sum will bring Rs 9161 to meet the maintenance charges of the water works of the Varuna Vilas works amounting to Rs 10,000

CENTRAL OFFICE,

Bangalore. 12th January 1900

From

The Chief Engineer of Mysore,
Bangalore.

To

The Secretary to Government
General and Revenue Departme

SIR,

In para 4 of Government
No 4834-5/490 of 7th August 1890, it was
that, on the transfer of the water
of the Kukkerhalli reservoir ab[ove] imp
to the Municipality, the cost of their
maintenance will devolve on
Municipality. It was reported to
in this office No. 2586 of the 23d June 18
that the above water works were
-ferred to the Municipality from 1st
1891.

11 The Superintending Engineer
circle in his Return of Sanctions for
1899, having provided a sum of Rs 1,436
The annual repairs of the Kukkerhalli
Supply Reservoir, he was asked to
reference to the Municipality,

The Govt are pleased

to make a free gift of

the

the Vani Vilas water works to the Mysore City [illegible]

[illegible]

(2) Considering that the municipality has paid nothing towards the construction of the said works and that the annual cost of maintenance thereof (including the additional distribution works hereby ordered to be transferred to the Municipality) is comparatively small, the Govt trust that the Mty will find it possible to maintain the works and keep up permanently a proper distribution from its ordinary income, which can, if necessary, be revised without having to impose a special water-rate for the purpose

purpose. If, however the city is really unable to provide the necessary funds as above, the Govt will then be prepared to consider the desirability of imposing a water rate.

(3) The maintenance charges for 1898-99 (~~including~~ ~~up to~~ ~~the 30th June 1899~~) are remitted as a special concession (but the Board will distinctly understand that no further concession of this kind will be made for fortheom years

(4) The charges for 1899-1900 will be calculated with

with effect from the 1st July 1899 without reference to the date on which the management may be actually assumed by the Municipality or to the levy of any special water rate levy et. The estimate for Rs 9072 for the year 1899-190. submitted by the Chief Engineer is sanctioned with the remark that the actual outlay incurred should be reported at the close of the year for recovery from the Municipality

(5) The payment on account of main trunk Charges

5th

charges should include.

the cost of working the Pumping station whether or not the Board is able to take over the management of these immediately.

(6) The House tax can of course be pressed on the leases of the rental value, as proposed by the Municipal Board, who will take the necessary steps for the purpose at the earliest opportunity.

Draft order

MYSORE CITY MUNICIPAL PRESIDENT'S OFFICE,

Dated 5th September 1898 ~~1898~~ 1898-99-7

To

The Secretary to the Government of Mysore,
Revenue and General Departments.

SIR,

With reference to Govern-
ment proceedings no 9412-4 dated 15th
in continuation of G 103-92 February 1900, ordering the transfer of
the Additional distribution of Water-
works to the Mysore City Municipality,
I have the honor to report that when
taking over charge of the works, the
Municipal Engineer found several de-
fects as stated in his report (which
is herein enclosed for reference).

I beg to request that the
Superintending Engineer, Sanitary works,
may be requested to rectify them
before handing over the same

to the Municipality.

I have the honor to be,
Sir,
Your most Obedient Servant
Thanquin Lay Sing
For President

P.S.

Ward 5-6-Dg 7-7

The Vice President
Mysore City Municipality

Sir,

I beg to Submit that I examined the fountains and line of additional distribution of water to aforesaid, proposed to be transfered to the Municipality in Company with water Inspector and beg to report as follows.

1 The Value stones in Vani Vilas road for the 2½" main to Dodda kolapur has three sides built of brick in mortar and plastered with chunam and the four sides has been kept together without any Cement materials, the Covering slabs ill laid and no proper bond the same is the case with regard to the Value stones for the 4" main going to Kyathamara and Dodda kolapur from the 4

2. On the lines to Wontakopla and Padavarhalli, no road boxes for Valves have been used. The line to Padavarhalli was examined, by making a bore and placing an air-valve and another simple stand pipe. After this water was found at a high level, but no water in the line further down than Mr. Dunham's bungalow - this portion also having a good supply only during nights.

3 There is a wall fountain on Vellore road has no road box and no stop cock house.

4 The self closing two tap fountain on Dr. Subbiah's road has no road boxes and no stop cock houses.

4 The Valve houses to the Public office road main near Police Quarters has two sides built of brick in Chunam and Chunam - plaster, the other two sides being built to dry-heaped together, and top easily removable.

The

5 the Valve house &c. of the line to Palace opposite North gate, Dawan's house is in the same condition as above.

6 the stop cock house in Queens Quarters has been dismantled and has not been rebuilt. Road box frame is left with the debris and no cover. Of the two Kanadian fountains, one was removed during Royal Marriage and replaced by ordinary wall fountain, the other has lost one of the fixing nails and is broken.

7 the Covers for road boxes to Dawan's bungalow located on Dawan's road and the other at Narrainasteys road have been lost and have not been replaced.

8 For the Cattle trough ball valves fountain near Nayer bad Police station, no stop cock house has been built and no road box provided.

9 Six fountain in old P. & Telegraph office, no stop

cock

Sir,

Sl 3 1½ V, 33

Adverting to your Nos: 11388 / L. S. 103-92 & 12354 / L. S. 103-92 dated 14. April & 12. May 1900, respectively, I have the honor to forward the enclosed copy of letter No: 1969/402 dated 26. Ultimo, from the Sanitary Superintending Engineer, furnishing explanation regarding the stoppage of Pumping works at Belgola, during March 1900.

II The irregularities referred to in para III of Your Lr. letter were duly reported to Sir K. Sheshadri Iyer, to whom it was suggested that the direct intervention of Government was needed to put a summary stoppage to the waste complained of, as the Municipality apparently took no practical interest in the matter. But no orders thereon have yet been received.

III The matter referred to in para IV will be enquired into.

I have the honor to be

Jas Campbell Colonel

Chief Engineer of Mysore

Encl

No. 1969/402 Dt. 26. August 1900

1 S 16-97-8

From Supdg.
The Sanitary Engineer with the
Government of Mysore

To
The Chief Engineer of Mysore

Sir,

In continuation of my Camp No 54 dated 18 May 1900, promising to submit a full Report on the Pumping works at Belgola, I have the honor to state that the works were opened in April 1896, and during the 4 years and 4 months they have been working, the average annual repairs to Rs 2,33/ as under.

Repairs to Turbines &c and Rising Main:-

1896-97 = Rs 1,881
1897-98 = " — 2198
1898-99 = " — 1,687
1899-00 — " — 2,765
Total 8,531

II There is no workshop attached & therefore every little work has to be sent either to Bombay or the Railway workshops which greatly adds to the cost, yet the maintenance charges of these works is very small compared with those at Hemavathi —

Repairs to machinery

1897-98 = 4,380

1898-99 = 8,414

Total 12,794

III Machinery working night and day must have considerable wear and tear, and especially in those parts that revolve at great speed (300 Revolutions per minute), such as the upright shaft and Pinion & Bevel wheels.

sl:

IV In August 1899 and April 1900, Indents were sent to England for duplicates of all wearing parts; but the marriage ceremonies having been arranged for June following, before the articles indented for in April could arrive, it was considered necessary, as a precaution against accident during the period of the festivities, to order 2 Bevel wheels and short lengths of shafting, which were most worn, from Bombay. One of the turbines was therefore stopped on the 13th March 1900, and its shaft and Pinion wheels sent to Messrs. Richardson & Cruddas as patterns for supplying duplicates. Portions of this consignment were lost by the Railway Co. in transit, though to insure rapid delivery they were sent as parcels by passenger train.

&c

as the recovery of the missing parts appeared hopeless and the marriage date was fast approaching, the other Turbine had also to be stopped, and its gearing sent as sample to Bombay for duplicates. These arrived in time to be picked up and pumping was resumed before the marriage, during which the town was fully supplied, notwithstanding the extraordinary demand for water owing to the great increase in the population.

II The stoppage noticed in Remarks note of the 29. March 1900 and Chief Engineer's No 2134 dated 15. May, was owing to the above cause, and was not due to any break down of the machinery.

III As regards the reference to "original bad workmanship". I beg to state that there has been an unequal wearing of the bases owing either to slight settlement of the masonry, which was run up rapidly or to the setting up being slightly out of plant, and such defects are almost unavoidable with intricate machinery, but there has been no radical defect, and this fact has been proved by the running of the machinery night and day for 4 years. With the third Turbine now on the passage out, there will in future be no suspension of pumping for repairs, and the slight

repairs

in original setting up of the former 2 Turbines will be thoroughly rectified.

VII The stoppage of Turbines for petty repairs has at no time been for long periods, and generally such repairs have been arranged to fit in with the closing of the Channel for removing weeds & for annual Sand clearing. Such stoppages would not be felt by the populations, as the reserve of water stored at the Town end would be sufficient if the consumption is restricted to the purposes defined by the Act, and for which alone the system of pipes and the pumping power have been calculated.

VIII The irregularities reported as regards improper consumption and the overtaxing of the pipes by the Establishment of numerous house connections in the reference entered on the margin are still undiscovered by Government, and in this connection

No: 2917-621 of 27 9/97	to Chief Engr: of Mysore	I beg
" 3591-784 of 2 12/97	— ditto —	leave
" 1640-369 of 24 6/98	— ditto — Para II	to bring

FROM
The President, City
Municipality, Mysore

To
The Secretary to the
Government of Mysore
Genl & Rev: Depts

Dated
Despatched 12th September 1900
Received

General No. 179
No.

Enclosure No. 1

With regards to the complaint about the insufficient supply of water in the City from the 1st to 3rd instant, begs to state that owing to the turbines being stopped for a week by the Sanitary Department, the water stored up in the Outikoppal Reservoirs lasted only for 4 days, the arrangements afterwards, have been made to supply water from Hukkaxahully tank as far as it can [illegible]
[illegible].

No. 179

Enc. No. 1

MYSORE CITY MUNICIPAL PRESIDENT'S OFFICE,

Dated 12th September 1900 ~~1899~~.

To

The Secretary to the Government of Mysore,
Revenue and General Departments.

SIR,

With regards to the Complaint about the insufficient supply of water in the City from the 1st to 3rd instant, I have the honor to submit a statement showing the quantity of water in the Reservoirs at Cutitoppal from the beginning of July last. From it, it will be seen that both the turbines stopped on the 27th of last month and the supply collected in the respective Reservoirs till then lasted for four days. Afterwards arrangements were made to supply water from Hukaxahully Tank. The low lying parts of the City had sufficient supply of water. In the high levels, all the service fountains specially built for regulating the supply of Hukaxahully Tank water were discharging, though not to meet the full demand. Whenever turbines stop working on account of repairs, arrangements are made in consultation with the Sanitary Department to

to give Thekaxahully water to the low por-
tion and to the higher portion Cauvary
water for limited hours. This arrangement
was made in consultation with Mr. Standish
Lee and it continued till the 27th ultimo. The
Supervisor in charge of the water works intimat-
ed in his docket no 165 dated the 25th instant
that both the turbines would be stopped for
8 days on account of some works necessary
for fixing the 3rd turbine and that the water
then stored in the Outlitoppal Reservoirs
to be used economically.

Cauvary water was accordingly
given to one portion of the Town for limit-
ed hours in the mornings and evenings; and
with all that, the water in the Reservoirs last-
ed for only four days. Ho Cauvary water
was available on the 1st instant and Theka-
xahully water was let in till the 3rd in-
stant when the turbines resumed work.

This is not the only occasion
when such a difficulty for want of water
was experienced. On the 4th and 5th May
1900, the turbines were stopped all of a
sudden and Mr. Standish Lee informed
that the works at Balagola failed and
reasons therefor, are given in the letter

letter addressed to Government, a copy of which is herein enclosed for ready reference.

The Balagola water works and Ouvitchpal Reservoirs are under the immediate Supervision of the Sanitary Department, the cost being met by the Municipality. A large Establishment is maintained; but with all that, the difficulty for water in the City is increasing. New Superintendents to manage the works are appointed from time to time with no better result. I beg to suggest that, if a good mechanic is employed to manage the machinery and the whole work is placed under the direct management of the Municipality, I am confident that there will be no room for frequent complaints as at present. An Engineer may be deputed to examine the plant and machinery once or twice a month and report on the same. The present System has failed needs no demonstration.

Dr. Standish Lee always ready to attribute the failure or insufficient supply of water to wash by the Municipality. I have already

82

to Government in my letter No 89. dated 7th August 1900 to introduce in Bangalore Water Bye-laws and allow the municipality to use Water meters to house-connections.

I have the honor to be,
Sir,
Your most obedient Servant
H Manjunatha Iyer
For President

No. 606

Enc. No. –

MYSORE CITY MUNICIPAL PRESIDENT'S OFFICE,

Dated 6th May 1900 ~~189~~ .

To

W L 98 91-10

The Secretary to the Government of Mysore,

Revenue and General Departments.

SIR, .

In Continuation of this Offices No 535 dated 4th April 1900 regarding the failure now and again of the Cauvery water supply to the City of Mysore, I have the honor to state that that supply has actually ceased now. When about 3 or 4 days ago, we observed the stoppage of water. We asked Mr Lee, Superintending Engineer. He said that the works at Balagola had failed and wrote down the following instructions –

(1) Reduce the public taps of the Cauvery supply by one half –

(2) Stop all house connections of Cauvery supply.

(3) The usual full supply will, it is expected, be [illegible] in a week.

(4) Cause of the supply [illegible]

running short is owing to some wheels of the turbine having been lost while in transit to Bombay.

"Copy" 2nd May 1900 (Sd) Standish Lee

We are now supplying water from the Kukatpally tank. That serves only the low lying parts of the City.

I have &c:

General and Revenue Departments.

Sir,

I have the honor to State that the Supervisor of W S Range Mysore reported to the Vice President in his docket No of the march 1901 that one of the two turbines working in the Vanivilas Water works Balagola, was stopped owing to the short supply of water in the Devaraj channel consequent on its having been opened by the channel overseer attached to the French Rocks Division from the 9th instant for irrigation purposes the Vice President having forwarded the above Communication to me, I at once addressed the Executive Engineer French Rocks Division in view to immediate orders being issued to the Channel Subordinates to regulate the supply for irrigation purposes so as to leave 3½ feet of water in the Devaraj

Docket No 236 dated 13.3.1907 of the
Memo No 294 dated 15.3.1907 to the Vice President.

Channel, that quantity being necessary to keep both the turbines always in action.

I further instructed the Vice President to see that all wastage of drinking water is prevented and to take prompt steps for Completing the pumping arrangements at the Rukkarakalli Tank so as to be fully prepared for any unforeseen emergency.

As there is a very small supply of water left in the Rukkarakalli Tank, the City has to depend mainly on the Vanivilas Water works to enable it to tide over the present hot season and I beg that early orders maybe kindly issued to the Public Works Department to the French Rocks Executive Engineer instructing him to carefully regulate the supply of water in the Devaraj Channel and avoid any interference with the working of the turbines by endowing a sufficient flow in the said Channel.

The marginally noted Communica-

tion

Communications on this subject are herein
enclosed for perusal.

I have the honor to be,

No 256
Ecc

Dated Mysore 15th March 1901

From

The Deputy Commissioner
Mysore District

To

The Executive Engineer
French Rocks Division.

In forwarding herewith Copy of Docket 1923 dated 13th March 1901 from the Supervisor, Mysore to S. Range to the address of the Vice-President Mysore City Municipality, bringing to notice the short supply of water in the Devaraj Channel owing to its having been opened for irrigation purposes from the 9th instant has the honor to request that the Executive Engineer will be so good as to issue immediate orders to his Subordinates to regulate the supply of water for irrigation purposes so as to leave 3½ feet of water in the said Channel as the quantity is reported to be

necessary to keep both the turbines at Vanivilas water-works constantly in action. Otherwise the Mysore city would be put to very serious inconvenience for want of drinking water especially during the present hot season.

The Executive Engineer is doubtless aware that this is the only source of supply now left to the city.

HRJ

Memo No. 294.

Copy of a letter addressed to the Executive Engineer is herewith forwarded for information of the Vice President. It is absolutely necessary that all wastage of water or its diversion to other than strictly domestic purposes should be prohibited and I shall be glad to know what action is taken in the matter. It is also necessary that by curtailing the supply to the City as far as possible, we should have the stores in the Chetlapattu filtering reservoirs to the maximum quantity they will hold. This important point should be constantly kept in view. The necessary steps should also be taken to have pumping arrangements of the Kadambadi tank completed as early as possible against any future such emergency.

Enc. No. Dated 18th June 1901 ~~189~~ .

M 58-97-19

To

The Secretary to the Government
of Mysore,
General and Revenue department

SIR,

With reference to Government Proceedings no 9440-1/LF 1032 92 dated 4th February 1901, enquiring whether the Board is prepared to meet the salary of the mechanic proposed to be employed and the cost of monthly or fortnightly examinations of machinery at Belagola Pumping Station, by an Executive Engineer, I have the honor to reply in the affirmative.

Now that the 3rd Turbine has been set up, I understand that the question of removing the present Pumping Establishment has already engaged the attention of the Officiating Chief Engineer. The question as to the arrangement necessary for the efficient Supervision of

of the Turbine Machinery, is also a matter, which must be left to the discretion of the Chief Engineer.

With reference to the transfer of the Turbine Establishment to the management of the Municipality, I beg to take this opportunity to state, that at present four Departments are concerned in the management of the Vani Vilas Water Works and the Devaraj Channel. This has led to the neglect of the Channel to such an extent as to give room for repeated Complaints

From the enquiries made by me, on the Revenue Side, the Channel requires special repairs as it does not appear to have been attended to for the last 6 years. The present management of the Channel having failed to give satisfaction, I beg to suggest that it may be handed over to the Charge of the Revenue Department.

an experimental measure and the annual maintenance allotment placed at its disposal to be worked out through the agency of the interested ryots. The Officiating Chief Engineer, with whom I had an opportunity of discussing the question, is of the same opinion.

I further beg to propose that the Turbine Establishment, may be made directly responsible to the Municipality, which should have the sole Control of the Water Supply from the Turbine Works

The Contingent Reservoirs may also be transferred to the Municipal management as there is no necessity for a separate Department to be in charge of the same

I have the honor to be,
Sir,
Your most obedient Servant,

My dear Mr Nanjunda Ray Urs,

I attach a slip cut from the "Daily Post" to let you see that the maintenance charge for Mysore, being only Rupees 11,492/- as compared with Rs 67,067 + 15,0789 for Bangalore, the Commissioners should not hesitate to pass it

yours truly
(Sd) Standish Lee

Vice Presidents reply —

Many thanks for your D O dated 25th Instant forwarding a slip of the "Daily Post", for my information. Certainly the expenditure for the maintenance charge of the Vani Vilas Water Works is great deal less than what they spend in Bangalore. For this economy we all feel thankful to you. But in the statement you sent for the information of the Board, you have given only Rs 6.464/-; therefore I suggest

you to send a det
Statement for Rs 11,492/- for
the information of the Commis-
sioners. Expecting that you
will send the same soon,

I am Sir.

Note regarding proposed reorganization of the Belgola Pumping Station Staff and Channel Maintenance.

This pumping station was opened for the supply of water to the City of Mysore on the 14th April 1896

2 The installation originally consisted of two turbines each geared to a three throw force pump. Calculations by the Makers showed that these two pumps would be ample for the supply of the city for many years to come, under the conditions such as fall to turbines Amount of water in Channel & head of the pumps against them laid down by our Engineers

3. There can be no doubt that the furniture of the pucka work & machinery like the Makers specifications and the many [illegible] indents [illegible]

General and Revenue Departments.

In reference to Govt:Pros:No:1654-57/L.F.103-92 of 29th July 1901,has the honour to state that in the opinion of the Offg Chief Engineer of Mysore it is absolutely necessary that the Turbines and pumps at the pumping Station of the Vani Vilas Water Works be periodically inspected by a qualified mechanic; and that the substitution ordered by Government of Mr.Rangasawmy Iyengar in lieu of Mr.Schaeffer to inspect this machinery once a month is undesirable for reasons given below.

The small and cheap staff employed at the pumping Station does not provide for a properly qualified mechanic thoroughly acquainted with the mechanism of the machinery.Such a qualified man,who would know exactly what was wrong with any part of the machinery when anything goes wrong,and be able to apply the remedy himself could not be got under Rs.200/- a month with allowances.What is wanted is a fitter and mechanic,who works with his own hands at all the repairs;some repairs have at times to be done at the bottom of the Turbine shafts entailing manual labour;and although Mr.Rangasawmy Iyengar is perhaps perfectly qualified to do the needful,it could not reasonably be expected that an Executive Engineer should be allowed to spend his time on occasions at the bottom of a Turbine shaft in his shirt sleeves;and the only other alternative would be for the Executive Engineer to trust to the incompetent staff working daily at the pumps to carry out his instructions.

Under these circumstances,and if a recurrence of the deplorable deterioration in this expensive machinery during the last 5 years is to be provided against,it is necessary that Government sanction the proposal to employ Mr.Schaeffer to

Mysore P.W.Department

Central office,

No. 4986 Dated Bangalore, 9th September 1901.

From,

W.Mc Hutchin Esquire, M.I C.E.

Offg.Chief Engineer of Mysore.

To,

H.V.Nanjundayya Esquire, B.A., & B.L.

Secretary to the Government of Mysore,

General & Revenue Departments.

Sir,

With reference to Government Proceedings No.1654-57 /L.F.103-92 dated 29th July last, conveying sanction to the transfer tentatively of the Vani Vilas Water Works, to the Mysore City Municipality for maintenance for a period of one year, I have the honor to forward the encl sed extract of paras 1 & 2 of Sanitary Superintending Engineer's docket No.2080/ 449 of the 27th August 1901, for information.

I have the honor to be,

Sir,

Your most obedient servant,

W W Hutchins

Offg.Chief Engineer of Mysore.

No.2080/449 dated 27th August 1901.

From,

The Superintending Engineer,

Sanitary Works Department.

To,

The Chief Engineer of Mysore.

Chief Engineer's No.4366 of 8th August 1901, forwarding copy of Government Proceedings No.1654-57/L.S.103-99 of 29th July 1901, issuing orders transferring the future management of VaniVilas water works to Mysore Municipality, and also copy of his proposals to Government for information.

---------- 0000----------

Referring to the above, has the honor to report that the works were handed over to Municipality on 24th and 25th inst. personally by the undersigned to the Vice President and the Municipal Executive Engineer. The President deputed to take charge.

2. The overhauling of old turbines will be completed in course of the next month, when the mill also will be handed over.

No 266 136 Dated 5

From A. Ramanuja Iyengar
President City

To
N. V. Narayanadayyah
Secretary to the Govt of
General and Revenue Dept

Sir,

I have the honor to State that the numbers of Sowdies for pumping Station and Channel of the Vani Vilas Water Works were Rs 6/- each as Sanctioned in Government Proceedings No 94 12-4/103-92 dated 15 February 1892 but during last year, the pay of one Sowdy reduced to Rs 5/- temporarily and the Services of the Sowdies were placed at the disposal of Sanitary Department who were paying the charging his pay to Vani Vilas Water Works' mate

At the time of preparing the budget, information not being available in this office, entries were made according to the then existing rate of pay and number of Sowdies.

I, therefore, request that you will be good enough to obtain the Sanction of Government for retaining the Sanctioned number of 5 Sowdies at Rs 6/- each. By this, the Budget provision will have to be raised by Rs 7/- a month which will be provided for in the Supplemental Budget for the current year.

I have the honor to be
Sir,
Your most obedient Servant

Report

In the new Reading extension Mandi Mohalla houses are under construction and want of water is felt very severely there being no water within a distance of two furlongs from the house sites and cost of bringing water for house construction being a heavy item for the poor, who have started the Construction of their houses. So this estimate is submitted for approval and sanction.

To

M. V. Nanjundayyah Esqre M.A
Secretary to the Govt of Mysore
General and Revenue departments

Sir,

In submitting for the orders of Govern-
-ment correspondence resting with Hesara-
-ghatta Division Executive Engineer's no 299
dated 13/14th march 1902 and the copy of the
resolution of the Board in regard to an
Estimate amounting to Rs 2040/- for over
-hauling the turbines at Balagola, I have
the honor to state that this estimate is
for a work executed before the turbines
were formally handed over to the Muni-
-cipality It was only on 7th march 1902
that the municipality took Charge of the
turbines. In sub para II of Chief Engineer's
letter no 3502 dated 28th June 1901 pub
-lished with Government Proceedings
no 1654-7/C7 103-92 dated 29th July 1901, it is

stated that all works in connection with the turbines will be completed by the Sanitary Superintending Engineer. This charge is therefore one which the Board in its present condition of their impoverished exchequer, feel handly able to bear. I beg therefore that you will move the Government to sanction this amount out of "State funds".

I have the honor to be
Sir,
Your most obedient Servant

Sir,

I have the honour to submit, for the orders of Government, the accompanying copy of the resolution of the Board in regard to the Chief Engineer query contained in his letter No. 3849 dated 7th July 1902, copy enclosed for ready reference, whether the Municipality would bear the cost of three new Turbines required for the Balagola Water Work

As the City solely depend for its supply of water on the Balagola Water Works it is

absolutely necessary to safeguard against any breakdown of the Turbines. The present Turbines are reported to require replacing and the cost of the new Turbines will be about Rs 5,000. The Board has resolved that the old Turbines may be taken charge of by Government and that they may be relieved of a moiety of the cost of the new Turbines.

Mysore

Sir,

I have the honour to forward the enclosed correspondence ending with letter No. 209 dated 27th ultimo, from the Executive Engineer, Hesserghatta Water Supply Division on the subject of providing new Turbines for the Balagola Pumping Station, and to inform you that 2 new Turbines will be required at an early date to replace those erected in 1893 as they are much worn out. Three new ones of the suggested design will be a great improvement

as they will be more effici and a great saving effected in point of repairs. The cost of these 3 will be £300 and including the cost of setting up, say Rs 5,000/-. The 3 old Turbines should fetch a fair price, if sold

II I should like to know if you will be prepared to provide the necessary funds for the 3 new Turbines about Xmas, in which case I will order them at once.

(Signed) W. S Traill, Captain R.E
Deputy Chief Engineer
of Mysore

B A
PRESIDENT, CITY MUNICIPAL COMMISSION,
MYSORE.

To

L. Anantadanna Rao Esqr
B A
SECRETARY TO THE GOVT. OF MYSORE,
REV. & GEN. DEPTS.

Sir,

With reference to your docket no 1981/A.7103 92 dated the 26 October 1903 requesting that the sanction of the Board be obtained to the excess amount payable to Mr Dashwood Owner of the Balapet Pumping station, I have the honour to state that the Commrs have resolved to sanction the excess amount Rs 68 & 9 as per particulars given

in the margin out of the savings effected in the Vani Vilas Water works Establishment.

A copy of the Resolution of the Board is appended.

As the Budget grant for Vani Vilas Water works for 1902-1903 has already been exceeded as reported in this office no 82 dated 26 November 1903, this excess amount will have to be met from the General savings of Budget grant for 1902-1903.

Pay due to Mr Dashwood from 17th December 1902 to end of Feb. 03 at Rs 50 per month as already reported in this office no 45 dated 24th September 1903 — 125-3-1	
As Mr Price was on privilege leave from 17-12-02 to 15-1-03, amount available out of the pay of Mr Price from 16-1-03 to end of February 03 at Rs 37½ per month - - - - -	55-10-4
Savings effected from the pay of Driver Durham who went on leave without leave from 26th Sept. 1902 to end of February 03 and for whom only an acting incumbent was appointed on half pay, Rs 37-8-0	193-12-0
Total amount available	248-6-1

I have the honor to be,
Sir,

SIR

In reply to your docket No 4833/22 03-02 dated the 9th instant enquiring whether the Excess Amount of Rs 68-8-9 paid to Mr. Dashwood, Acting Engineer in the Mysore Vanivila Water Works, has been included in the City Municipal accounts for 1902-03, I have the honor to state that the payments made to Mr. Dashwood aggregate Rs 120-5-2 as detailed in the margin and not Rs 124-3-1. as stated in the Resident's reference (No 168 dated 10th May 04)

Month & payment	Amount	Remarks
January 03.	20-5-2.	Pay for Dec 02.
Feby 03.	50- —	January 03.
March 03.	50- —	do Feby 03
Total Rs.	120-5-2	

The amount paid in excess of the Savings available viz Rs 64-10-0, was included in the accounts for 1902-1903 and forms a part of Rs 8402-10-3 already sanctioned in Mol No 3042-3 dated 17th February 04. L2 12-02

DRAFT REGULATION.

A Draft Regulation to amend in certain respects the Municipal Regulations of 1871.

Preamble.

WHEREAS it is expedient to amend in certain respects the Municipal Regulations of 1871 as in force in the Cities of Bangalore and Mysore ; Her Highness the Maharani-Regent is pleased to enact as follows :—

Insertion of sections 62A to 62G.

1. After section 62 of the said Municipal Regulations, the following sections shall be inserted, namely :—

Power to levy octroi.

"62A. The Municipal Commissioners may, with the approval of the Government, and for the purposes of these Regulations, levy an octroi on animals or goods or both brought within the octroi limits of the Municipality for consumption or use therein, at such rates as may, from time to time, be approved by the Government.

Power to examine and search for article liable to octroi.

"62B. (1) Every person bringing or receiving within the octroi limits of the Municipality any article liable to octroi shall, when required by an officer authorized by the Municipal Commissioners in this behalf, and so far as may be necessary for ascertaining the amount of tax chargeable,—

(*a*) permit that officer to inspect, examine, weigh and otherwise deal with the article ; and

(*b*) communicate to that officer any information and exhibit to him any bill, invoice or document of a like nature which he may possess relating to the article.

(2) If any person bringing or receiving any conveyance or package within the octroi limits of the Municipality refuses, on the demand of an officer authorized by the Municipal Commissioners in this behalf, to permit such officer to inspect the contents of the conveyance or package for the purpose of ascertaining whether it contains any article liable to octroi, such officer may cause the conveyance or package to be taken without unnecessary delay before any Magistrate or Municipal Commissioner, who shall cause the inspection to be made in his presence.

Presentation of bill for octroi

"62C. Every officer demanding octroi by the authority of the Municipal Commissioners shall tender to every person introducing or receiving any article on which the tax is claimed, a bill specifying the article taxable, the amount claimed and the rate at which the tax is calculated.

Recovery of octroi.

"62D. (1) In case of non-payment of any octroi on demand, the officer empowered to collect the same may seize any article on which the octroi is payable.

(2) The Municipal Commissioners may cause any article so seized, or so much thereof as may be necessary, to be sold by auction to satisfy the demand with the expenses occasioned by the seizure, custody and sale thereof, (unless the demand and expenses are in the meantime paid,) after the lapse of five days from the seizure, and after the issue of a proclamation fixing the time and place of sale :

Provided that, by order of the President, articles of a perishable nature, which could not be kept for five days without serious risk of damage, may be sold after the lapse of such shorter time as he may, having regard to the nature of the articles, think proper.

stand-pipes for the supply of water for the domestic use of the inhabitants. The said stand-pipes shall be placed at such intervals as may be prescribed by the Government for particular localities.

"198. When the Municipal Commissioners shall have carried out a system for the supply of water to the Municipality as aforesaid, or to any division or portion thereof, including such mains, pipes and stand-pipes as aforesaid, and such system shall, in the judgment of the Municipal Commissioners, be complete, the Commissioners shall, with the sanction of the Government, declare, by notification published in the *Mysore Gazette*, that the supply is complete, within the Municipality or any such division or portion thereof.

Notification of supply being complete.

"199. After it has been so notified as aforesaid that the water-supply in any district has been completed, it shall be lawful for the Municipal Commissioners to assess a rate upon all occupied buildings and premises within such district. The said rate shall be such as may, from time to time, be approved by Government; but shall not exceed the amount required for the annual maintenance of the said water-works and for the repayment with interest of the capital outlay thereon in such number of years as may be fixed by Government.

Water-rate may be assessed.

"200. Every householder assessed to, and paying the water-rate, shall be entitled to have, free of further charge or assessment in respect of the same, a supply of water for the domestic use of himself and his household.

Householder entitled to supply of water for domestic use.

"201. (1) Subject to such rules and restrictions as may be prescribed by the Government from time to time in this behalf, communication pipes may be permitted from the mains and pipes of the Municipal Commissioners for bringing a proper and sufficient supply of water for the domestic purposes of any rate-payer. The communication pipes leading the water from the mains and pipes of the Municipal Commissioners, into the house of any rate-payer, and the pipes and works within the house connected therewith, shall be of such character, dimensions and material, as the Commissioners, or their proper officer in their behalf, shall fix and approve, and shall be made and constructed at the expense of the person requiring the same.

Communication pipes, etc, to be made of required dimensions and at expense of house-holder.

(2). The quantity of water allowed to be drawn from the communication pipes free of charge by any rate-payer under this section shall bear a fixed proportion, to be determined by the Municipal Commissioners with the approval of Government, to the amount of water-rate leviable from him under section 199; and for any water in excess of such quantity drawn by such rate-payer a charge shall be levied at rates to be prescribed by the Municipal Commissioners with like approval.

Limitation of supply through house communication pipes.

"202. A supply of water for domestic purposes shall not include a supply of water for draught animals, or for washing carriages where such draught animals or carriages are kept for sale or hire, or a supply for watering roads or gardens, or for any trade, manufacture, or business, or for fountains, or for any ornamental or mechanical purpose.

What are domestic purposes.

"203. It shall be lawful for the Municipal Commissioners, with the previous sanction of Government, to supply water, at such rate and on such terms as may appear reasonable, for other than domestic purposes, and for trade, roads or gardens; manufacturing, business, ornamental or mechanical purposes; provided the person requiring such supply make application to the Municipal Commissioners in writing, specifying the purpose for which such supply is required, and the quantity likely to be consumed. And the Municipal Commissioners may thereupon lay down, or allow to be laid down, the necessary communication pipes and works, of such dimensions and character as may be agreed upon between the Commissioners and person requiring such supply. Provided, however, that such supply shall be liable to be stopped without giving rise to any claim for compensation, whenever the Commissioners may be of opinion that it would interfere with the proper supply of water for domestic purposes.

Supply for business.

"204. The communication pipes and works leading water from the mains and pipes of the Municipal Commissioners into any building or premises, must in all cases be executed subject to the inspection and to the satisfaction of the surveyor or other officer to be appointed in that behalf by the Commissioners. Such communication pipes and works may be made by the servants and workmen of the Municipal Commissioners, upon such terms as may be agreed upon between the Commissioners and the person requiring the supply, or subject to such charges as may be fixed by the Commissioners; and it shall be lawful for the Commissioners to require the amount necessary for the execution of such works to be paid or deposited before such works are executed, and such charges and expenses shall be recoverable in the same way as the water-rate.

Communication pipes, etc, must be made to satisfaction of surveyor.

"205. The Municipal Commissioners shall at all times keep and maintain in their pipes and mains a sufficient supply of pure water for the use of the rate-payers, and for the other purposes for which supply is required; and shall at all times, between the hours of five in the forenoon and eight in the afternoon, maintain a pressure of water in the pipes and mains sufficient to raise the water in all buildings and places in which the same may be introduced.

Sufficient supply of pure water to be kept.

"206. If any person supplied with water shall waste or misuse the water supplied to him, the Municipal Commissioners may stop the water from flowing into the premises in which such waste or misuse has occurred, by cutting off the pipe to such premises, or by such means as the Commissioners may think fit, and may recover the expenses of cutting off the water from such person.

Water may be cut off on waste or misuse.

"207. Whoever shall wilfully or carelessly break, injure, or open any lock, cock, main, or pipe, belonging to, or under the management or control of, the Municipal Commissioners, or constructed, or continued or maintained under these Regulations, or shall unlawfully flush, draw off, divert, or take water from any water works belonging to the Municipal Commissioners or under their management or control, or from any water or streams by which such water-works are supplied, shall, for every such offence, forfeit a sum not exceeding fifty rupees, and a further penalty not exceeding twenty rupees for each day during which the offence is continued after written notice in that behalf.

Damaging works or obstructing or diverting water.

"208. All rates and moneys collected, received or recovered for or in respect of the supply of water, or the execution of works, and all penalties or forfeitures connected therewith, or in any respect relating to the water-supply, shall be applied by the Municipal Commissioners in defraying the expense of making and maintaining the said water-works, in paying the interest of money borrowed for the said water-works, and in the liquidation of debts incurred connected therewith or for some other purpose connected with the supply of water; and if any surplus should remain thereafter, then the same shall be applied in reduction of the rates assessed for the supply of water.

Application of rates and moneys received from the supply of water.

"208A. The provisions of sections 197 to 208 shall apply *mutatis mutandis* to the water-works constructed, maintained or managed by the Government and to the Water Supply Department under the Government.

Application of provisions to water works constructed by Government

"209. Wherever any building or tenement is divided into flats, rooms, or portions in the occupation of different tenants, and also in the case of all buildings or tenements the annual value whereof is less than one hundred rupees, it shall be lawful for the Municipal Commissioners to assess the owner or landlord of such building or tenement, although he does not himself occupy the same, and to recover from him the rates imposed thereon for lighting and water, respectively.

Assessment may be on owner in certain cases

"210. The rates for lighting and water-supply shall be ascertained, fixed and collected in the manner, and shall be payable at the times, provided by sections 63 to 90 of these Regulations, both inclusive.'

Rates for lighting and water-supply.

K SHESHADRI IYER,
Deputy

READ THE FOLLOWING—

Docket No. 1075—5811, dated 6th October 1898, from the Secretary to the Government of Mysore, Public Works Department, to the Sanitary Engineer with the Government of Mysore.

With No. 666—148 of 12th March 1898, submitting an estimate amounting to Rs. 5,228, being cost of working expenses of the Vanivilas Water Works for the Mysore City for the year 1897-98.

In returning the above estimate duly approved, has the honor to inform the Sanitary Engineer that the Government have been pleased to order that the outlay already incurred on account of working expenses up to end of June 1898 may be debited to the original project under a separate head and explained in the completion report for the work. From the 1st July 1898, the working and maintenance charges should be levied annually from the municipality and an estimate providing for same should be submitted for approval.

No. 1076—5812, dated 6th October 1898.

Copy forwarded to the Secretary to the Government, General and Revenue Departments, for information.

2. Letter No. 862, dated 17th December 1898, from the Chief Engineer in Mysore, to the Secretary to the Government of Mysore, General and Revenue Departments.

With reference to this office No 1076—5812, dated 6th October 1898, forwarding for information copy of order to the Superintending Engineer (late Sanitary Engineer), Sanitary Works Department, to the effect that from 1st July 1898 the working and maintenance charges of the Vanivilas Water Works for the Mysore City will be levied annually from the Mysore City Municipality, I have the honor to forward the enclosed estimate amounting to Rs. 6,464 providing for the maintenance of above works for the current official year, and to request that you will be so good as to obtain formal sanction of Government in the General Department thereto.

II. The actual amount spent on account of maintenance will be intimated at the close of the official year to the Comptroller for recovery from the Mysore City Municipality.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 10th June 1891.

READ:—

Docket from the Deputy Commissioner, Mysore District, dated 21st April 1891, No. 83, submitting the Budget Estimates of the Mysore City Municipality for the year 1891—92.

Dockets from the Deputy Commissioner Mysore District, dated 13th October, 15th November 1890 and 3rd January 1891, Nos. 923, 1025 and 1179, respectively, regarding the purchase of Fire Engines for use in the Municipality.

No. 2854-5—L. 214, DATED 10TH JUNE 1891.

ORDER THEREON.—The Government resolve to review the Budget Estimates of the Mysore City Municipality for the year 1891—92.

Receipts.

2. The estimated income of the Municipality for the year 1891—92 is Rs. 1,07,389 against Rs. 83,271, the actuals of 1889—90 and Rs. 1,07,189, the estimate for 1890—91 as shown in the following statement. It must be here remarked that the Budget Statements have not been prepared in accordance with the instructions contained in Government Proceedings, dated 8th December 1889, No. 6861-70—157. In column 5 of the Statement No. I, the actuals of the first half of 1889—90 are given instead of the probable collection and expenditure of the second half of 1890—91. The former figures serve no purpose. The President is requested to take due notice of the carelessness of the Clerk, who prepared the Budget Statement. The Vice-President under whose orders the statement was prepared should have noticed it.

	Total Receipts	83,271	1,07,189	1,07,389	24,118	.

I Octroi.—The Municipal Board propose to abolish the duty on "Butter," "Oil" and "Oil-seeds" and to tax "Kerosine Oil" and "Metals, Iron" instead and have prepared the estimate accordingly. The alteration proposed being still under the consideration of Government, it is premature to estimate the effect of the alteration. The estimate for the current year will therefore be repeated under these heads. The decrease in the estimate under Cloth is ascribed to the reduction of duty on Indian made piece goods. The estimate is approved. The estimates under the other items do not call for remark. The total estimate under Octroi will thus be Rs. * 55,350.

		Rs.
* (*a*)	Cocoanuts, fresh and dry ...	6,000
(*c*)	Betel-leaves	6,500
(*d*)	Sugar	3,700
(*e*)	Jaggory	4,500
(*f*)	Ghee	6,400
(*g*)	Butter	450
II	Sheep and goats	5,000
III	Oil and Oil seeds	3,800
IV	Timber and Chunam ...	6 500
VI	Tobacco	5,500
VII	Cloths	7,000
		55,350

II Tax on Houses, &c.—It is stated that the yearly Jamabandi under this head is Rs. 14,000, and that Rs. 3,000 of the arrears of previous years are expected to be collected during 1891—92. The Government think that the estimate of Rs. 17,000 is excessive. It is not likely that the whole demand for the year will be collected within the year. The estimate will be reduced to Rs. 15,000. The cause of the very low actuals in 1889—90 should be explained.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 10th June 1891.

III License Receipts.—The estimate is stated to be based on the actuals of 1890—91 and is approved. The actuals of 1889—90 were low as the rates then in force were comparatively much less than those now charged.

IV Carriage Tax and V Tax on Animals.—The increase under "Carriage Tax" and decrease under "Tax on Animals" compared with the actuals have not been explained. The estimates will however be passed, as they are the same as those sanctioned for 1890—91.

VII Mohatarfa.—The large increase compared with the actuals of 1889—90 has not been explained. The omission should be supplied. In 1890—91, an estimate of Rs. 10,000 was passed as a large amount of arrears was stated to be outstanding and it is doubtful whether a similar sum will be collected in 1891—92. The President is requested to state the annual Jamabandi amount and the sum of arrears outstanding. Meanwhile the estimate for 1890—91 will be repeated for 1891—92.

VIII Rents.—The increase which is chiefly in (*c*) Markets is stated to be due to the extra number of market stalls to be rented out during 1890—91. The estimate is passed.

X Miscellaneous.—The new estimate of Rs. 5,139 under "(*e*) Land Revenue" is the assessment of lands within the Municipal limits of the Town, which, the Municipal Board requested, may be transferred to the Municipality. As the Government have declined to grant the application in their Proceedings dated 7th May 1891, No. 1480-1—L. 133, the estimate will be struck out. The increase under "(*m*) Contribution" is probably due to the mileage allotment payable by the Public Works Department for the maintenance of the District Fund roads recently transferred to the Municipality. The decrease under "(*a*) Sale of houses and lands" is apparently owing to the limited number of sites expected to be sold during 1891—92. The variations under other items are small and call for no remark. The estimate passed under this head is Rs. 5,800.

The income as now estimated amounts to Rs. 98,800. Adding to this the opening balance of Rs 11,911, the sum available for expenditure during 1891—92 is Rs. 1,10,711, of which Rs. 1,06,276 are proposed to be expended, leaving a balance at the end of the year of Rs 4,435, which is less than 25 per cent of the receipts by Rs. 20,265. The proposed expenditure has therefore to be reduced by at least Rs. 15,000. The Budget Statement of charges will therefore be returned, with a request that it may be revised and resubmitted limiting the expenditure to Rs. 91,000, instead of Rs. 1,06,276 as now estimated. The Government have no wish to interfere with the discretion of the Municipal Board in revising the establishments, but it is absolutely necessary that the working balance of at least $\frac{1}{5}$th of the annual receipts should be maintained at the end of the year. It should be clearly understood that no proposals, which are calculated to diminish the closing balance below Rs. 20,000, will be sanctioned by Government.

			Rs.

READ THE FOLLOWING—

Docket No. 1075—5811, dated 6th October 1898, from the Secretary to the Government of Mysore, Public Works Department, to the Sanitary Engineer with the Government of Mysore.

His No. 666—148 of 12th March 1898, submitting an estimate amounting to Rs. 5,228, being cost of working expenses of the Vanivilas Water Works for the Mysore City for the year 1897-98.

In returning the above estimate duly approved, has the honor to inform the Sanitary Engineer that the Government have been pleased to order that the outlay already incurred on account of working expenses up to end of June 1898 may be debited to the original project under a separate head and explained in the completion report for the work. From the 1st July 1898, the working and maintenance charges should be levied annually from the municipality and an estimate providing for same should be submitted for approval.

No. 1076—5812, dated 6th October 1898.

Copy forwarded to the Secretary to the Government, General and Revenue Departments, for information.

2. Letter No. 862, dated 17th December 1898, from the Chief Engineer in Mysore, to the Secretary to the Government of Mysore, General and Revenue Departments.

With reference to this office No 1076—5812, dated 6th October 1898, forwarding for information copy of order to the Superintending Engineer (late Sanitary Engineer), Sanitary Works Department, to the effect that from 1st July 1898 the working and maintenance charges of the Vanivilas Water Works for the Mysore City will be levied annually from the Mysore City Municipality, I have the honor to forward the enclosed estimate amounting to Rs. 6,464 providing for the maintenance of above works for the current official year, and to request that you will be so good as to obtain formal sanction of Government in the General Department thereto.

II. The actual amount spent on account of maintenance will be intimated at the close of the official year to the Comptroller for recovery from the Mysore City Municipality.

READ AGAIN—

Correspondence ending with letter No. 4170, dated the 7th September 1900, from the Chief Engineer, in regard to the stoppage of pumping works at Belagola.

Letter No. 179, dated the 12th September 1900, from the President of the Municipal Commission, Mysore City, suggesting that the management of the Belagola Water Works be handed over to the Municipality and that occasional inspection by an Engineer may be arranged for.

Letter No. 3502, dated 28th June 1901, from the Chief Engineer of Mysore :—

CONTROL OF DEVAROYA CHANNEL AND VANI VILAS WATER-SUPPLY.

With reference to letter No. 830 of 18th instant, to your address from the President, Mysore City Municipality, I have the honor to request early sanction to the following arrangements being made from the 1st July next, for the control of these works, pending the decision of Government on the larger questions referred to them for orders in the Joint Report on the working of the drainage and water-supply systems in the Mysore City, submitted with this office No. 2033, dated 10th April 1901 :—

(1) That the whole length of the Devaroy channel be handed over to the Deputy Commissioner, Mysore district, for maintenance and that he also have complete control of the head sluice, and the supply of water to the turbine and for cultivation under this channel, the usual annual allotment for the channel being handed over to the Deputy Commissioner for its maintenance. Any special repairs, or improvements, or such works as may be necessary, and which cannot be met from the year's maintenance allotment, will be referred to the Superintending Engineer, Western Circle, for orders, who will make arrangements for carrying them out after proper investigation.

(2) That the whole of the turbine-house establishment (as recently revised in accordance with the Officiating Chief Engineer's orders) be handed over to the President of the Mysore Municipality, under whose orders they will work from 1st July 1901. Details of this establishment, &c., are given in the enclosed copy of the Deputy Chief Engineer's note of 5th instant. But questions involving changes in the establishment now fixed, or any matter concerning the machinery, be referred to the Chief Engineer for orders. All works, however, in connection with the erection of the new turbine and pump, the inlet and other works in connection therewith, will be completed by the Sanitary Superintending Engineer, and handed over to the Superintendent at the Pumping Station.

Supervisor Balakrishna Rao after the completion of the inlet and works in connection with new turbine will be transferred, if the Municipality have no more need of his services at Mysore.

(3) That the whole of the other works in connection with the water-supply to Mysore City, the rising main, and the reservoirs at Ontikoppal (with existing establishments) be handed over to the control of the Municipal President, who will for the present refer all proposals in connection with alterations or additions to the present system, as well as any technical questions which may arise, to the Superintending Engineer, Western Circle, for opinion before carrying them out.

2. The above arrangements will place all the works under one general management. The divided control hitherto in operation has not worked at all satisfactorily, and after careful consideration, I consider the proposed changes should be given effect to at once.

Deputy Chief Engineer's Note to the Chief Engineer, dated 5th June 1901, regarding proposed re-organization of the Belagola Pumping Station Staff and channel maintenance.

This pumping station was opened for the supply of water to the City of Mysore on the 17th April 1896

2. The installation originally consisted of two turbines each geared to a three-throw force pump; calculations by the makers showed that the two pumps would be ample for the supply of the City for many years to come, under the conditions such as fall to turbines, amount of water in channel and head to be pumped against, then laid down by our Engineers.

3. There can be no doubt that the failure of the pumps to work to anything like the makers' specification and the very frequent interruptions for renewals of parts, and repairs to pumps and turbines are wholly due to the following causes :—

1st, Faulty erection of the plant,

2nd, Unskilled superintendence since erection, and as the pumping staff did the repairs, these were as badly carried out as the superintendence.

4. A third turbine and pump has now been erected, and will commence operations shortly, and as this pump has been erected by a skilled mechanic, it is believed we will obtain double the supply from it that either of the old pumps (of similar design and size) can give.

As soon as the new pump is in operation, the two old ones will be taken out (one at a time) and thoroughly overhauled, repaired and re-erected.

5. As it is not a question of doubt that the failure of the two original pumps is due to bad supervision and repairs, I consider it would be a fatal error to retain the services of the present Superintendent, and I therefore propose to re-cast the staff.

6. My proposals are based on a knowledge of the capabilities of the present staff :—

	Present Staff.	Salary.
		Rs.
1.	Superintendent Mr. Nieves	100
2.	Driver Mr. Durham	60
3.	Do „ Buchan	50
4.	Do „ Sitaram	35
5.	Do „ Price	35
6.	Do Hussain Khan	30
7.	Apprentice Fanceno	20
8	3 Greasers at Rs. 8	24
9.	1 Blacksmith	20
10.	1 Gardener	6
	Total ..	380

	Proposed Staff.	
		Rs.
1	Head Driver Mr. Price	75
2.	Driver Mr. Durham	75
3.	Do Hussain Khan	45
4.	Extra Driver Fanceno	30
5.	3 Greasers at Rs. 12 each	36
6.	1 Blacksmith	20
7.	1 Gardener	60
	Total	287

I also propose to appoint Mr. Schaefer, who is a 1st Class Mechanic, as Inspector of Pumps. His duties will consist in visiting the pumping station once a month and thoroughly inspecting the pumps, he will give his orders, *re* repairs, &c, and see that these are carried out in a professional manner. Mr. Schaefer was employed to erect the new pump and he thoroughly understands the installation.

I propose to allow Mr Schaefer Rs. 50 monthly, to cover his travelling expenses and remuneration for loss of time, he is now in business in Bangalore.

7. Messrs. Neaves, Buchan and Sitaram are employed on the work establishment and their services are therefore terminable with a month's notice.

I propose dispensing with their services at once, and giving each man a month's pay, in order to obviate the chance of serious accidents to the new machinery.

Officiating Chief Engineer's Orders, dated 5th June 1901.

I approve of these proposals for the revision of the staff, but I doubt whether Government sanction is not necessary for Mr Schaefer's periodical inspections.

The Revised Working Staff will come into operation as soon as ever the new turbine is ready to work.

Local Boards Branch, Municipal, dated 29th July 1901.

No. 1654-7—L. F. 103-92, DATED BANGALORE, 29TH JULY 1901.

ORDER THEREON—Government are pleased to sanction the Chief Engineer's proposals contained in his letter of the 28th June 1901, tentatively for a period of one year from the 1st July 1901, the only modification being that Mr. Rangaswamaiengar, Executive Engineer in charge of the Chamraj Water Works, will be deputed to inspect and report on the machinery and plant once a month, instead of Mr. Schaefer as suggested by the Deputy Chief Engineer.

2. The early submission of a supplemental budget of the City Municipality, providing for the cost of establishments as now reduced, will be awaited.

H. V. NANJUNDAYYA,
